EDUCATION

Bachelors of Computer Science (Hons.)

Expected May 2027

Carleton University

Ottawa, ON

Year Standing: 4th **GPA:** 3.8/4.0

Awards: Award of Excellence for Internationals (2022), President's Scholarship (2022)

Relevant Coursework: Statistical Modeling, Data Structures and Algorithms, Computer Systems, Operating Systems, Systems Programming, Discrete Structures, Fundamentals of Web Applications, Software Engineering, Business Strategies

EXPERIENCE

IBM - Software Engineer, Automations and Integrations

May. 2025 – present

IBM Global Sales, TechXchange

Ottawa, ON

- Architected new Champions Nomination Platform applying **AI classification and logic-driven scoring** to handle **20,000+ applications**, cutting review cycles by **80%** and saving **\$200K+ OpEx in 8 months**.
- Built **multi-agent AI framework with cross-platform integrations**, routing tasks to specialized agents for Outlook management, RAG knowledge retrieval, Slack/Airtable automation, and semantic search via **MCP servers, using Docker and watsonX Orchestrate**, cutting customer queries **80%** and operational overhead **75%**.
- Built CLI automation tool using **Selenium and AI-assisted code generation** that replaced 5-month manual workflow with one-click solution, improving productivity by **98%** and saving **\$50K+ annually**.
- Led cross-functional team to architect "AgentX," a **modular AI agent framework** leveraging **prompt engineering and LLM orchestration** to dynamically generate specialized roles through natural language in WatsonX Challenge.

SKILLS

Languages: Python, Java, JavaScript/TypeScript, C/C++, SQL (MySQL, Postgres)

AI/ML & LLMs: OpenAI API, Watsonx Orchestrate, RAG (ChromaDB, Milvus), Prompt Engineering, Whisper.cpp

Full-Stack Development: React, Node.js, Flask, Tailwind CSS, REST APIs, Docker, CI/CD, FastAPI

Cloud & DevOps: IBM Cloud, AWS, Azure, Linux/Unix, Bash, Git, Selenium, GitHub Actions

Development Tools: Cursor, Claude Code, GitHub Copilot, MediaPipe, NumPy, OpenCV, Matplotlib, ffmpeg

Design & Collaboration: Jira, Figma, Canva, Agile, Notion, Slack integrations

PROJECTS

Noted | *React, Python, OpenAI Whisper, ChromaDB, Flask, Docker*

- Architected full-stack **Gen AI transcription platform** implementing **RAG pipeline** with ChromaDB vector database and **LLM orchestration** for context-aware summarization
- Developed use case for educational accessibility, featuring annotations and automated PDF generation for offline study.
- Deployed with Docker and integrated YouTube API for automated, accurate transcriptions with responsive UI/UX.

Lokdin | *Python, React, TypeScript, OpenCV, MediaPipe, TensorFlow, Keras*

- Led team to **3rd place at CUHacking Hackathon**, building AI-powered engagement detection tool with applications in education, healthcare, and enterprise workflows.
- Engineered feature extraction pipelines with facial landmark detection and gaze tracking achieving **97% accuracy** on synthetic datasets using **TensorFlow/Keras**.
- Developed visualizations and heatmaps translating insights into actionable user feedback, enabling decisions **90% faster**.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

IBM Cloud Essentials Certification 🌐

Founder & President - ColorStack Carleton Chapter

Nov. 2025 – Present

Founder & President - Black Students in Tech Nexus

Mar. 2024 – Present

- Led product development for web development projects, managing cross-functional teams of developers and designers through **Agile workflows** to deliver client-focused solutions on time and within scope.
- Conducted stakeholder interviews and user research to define requirements, prioritize features, and align product roadmap with client needs, growing organization to **30+ members**.
